Design Inspiration

● Zohran Mamdani Campaign

Bold primaries. Community warmth.
Poster energy. Human scale.

Not this

Neon fintech. Corporate blue.
Techy dashboards. Cold UX.

Not this either

Generic matcha-girl pastel.
Too Pinterest. Too Meerab.

The Direction

Bold but warm. Graphic but
human. Elite-feeling, community-priced.

YOUTHPAY

Internal Design Standard · March 2026 · Confidential

WHO WE ARE

The Brand Philosophy

"YouthPay is the first money app that makes Hania feel important — not managed."

BRAND MISSION STATEMENT

BOLD

We speak loudly and clearly. No fine print. No jargon. No banker language. We say what we mean in the words Hania actually uses.

TRUSTED

Parents must feel safe. Hania must feel respected. Both must trust us. We never trade one for the other. We earn both simultaneously.

WARM

We are not a corporate card. We are not a lecture in an app. We are a friend who happens to understand money. Warmer than a bank. Smarter than a friend.

OURS

Made for Pakistan. For Karachi streets and Lahore markets. For Eid money and canteen runs. Not adapted from America. Built here. First.

DESIGN REFERENCE — ZOHRAN MAMDANI CAMPAIGN AESTHETIC

Zohran Mamdani's 2025 NYC mayoral campaign posters became a cultural moment because they used bold primary colors, strong sans-serif type, and a grassroots poster energy that felt genuinely community-made — not corporate-funded. They were memorable without being loud, political without being alienating. For YouthPay, we steal this energy: bold blocks, warm primaries, graphic layouts that feel like something a 17-year-old would want to put on her wall.

WHAT YOUTHPAY IS NOT**✗ Not neon fintech**

No electric purple-to-blue gradients. No dark mode as a personality. That is for crypto apps and gaming apps. We are daylight.

✗ Not corporate blue

No HBL-style navy-on-white. We use navy — but warm, not institutional. Navy paired with cream and tomato reads culture, not compliance.

✗ Not pastel Gen-Z

Matcha green and lilac are for Meerab's Pinterest board. Hania knows that palette and knows she is not quite there yet. We meet her where she is.

✗ Not educational app

We do not lecture. We do not quiz. Financial literacy is in the product design — savings vaults, spending categories — not in pop-up lessons she will skip.

FULL COLOR SYSTEM

The YouthPay Palette

#D62828
PRIMARY

TOMATO RED
CTAs, accent, energy
Headers on light bg
"The action color"

#F7C948
WARMTH

GOLDEN YELLOW
Highlights, Eid feature
Success states, joy
"The celebration color"

#1B2A4A
TRUST

DEEP NAVY
Parent app, headers
Footers, formal context
"The trust color"

#FAF7EF
SPACE

WARM CREAM
Background primary
Card backgrounds
"The breathing color"

SECONDARY & ACCENT

#2D7D46

Forest Green
Success, savings

#C96B3A

Terracotta
Warmth, offline

#F4B8A8

Soft Blush
Hania, feminine

#4A5568

Body text

#666666

Mid Grey
Secondary text

APPROVED COLOR COMBINATIONS

These are the only pairings used in the app.

Tomato + White
Primary CTAs, Alert banners, Active states

Navy + Cream
Parent dashboard, Trust contexts, Formal

Navy + Gold
Dark backgrounds, Premium accents, Headers

Cream + Ink
Body content, Reading surfaces, Cards

Green + White
Success states, Savings, Positive deltas

Gold + Ink
Celebrations, Eid feature, Reward notifications

YOUTHPAY · CONFIDENTIAL · MARCH 2026

TYPE SYSTEM

Typography

Poppins

Primary Typeface — All UI, Headings, Body, Labels

GOOGLE FONTS · FREE · FULL UNICODE · URDU-COMPATIBLE FALLBACK: NOTO NASTALIQ

TYPE SCALE — MOBILE APP

Display — 32px Bold	Screen titles, onboarding hero
H1 — 24px Bold	Section headers, balance amount
H2 — 18px Bold	Card titles, feature names
Body — 14px Regular	Descriptions, transaction details
Small — 12px Regular	Timestamps, labels, captions
Micro — 10px Bold	Tags, badges, ALL CAPS labels

ACCENT TYPEFACE — QUOTES & EMOTIONAL MOMENTS

"Made for you.
Finally."

Love Italic — Used for pull quotes, onboarding emotional moments, taglines. Sparingly. Maximum 2 uses per screen.

TYPOGRAPHY RULES

Never ALL CAPS for body text.

Reserved for 7–8px micro labels only. ALL CAPS at 14px+ feels like shouting at Hania.

Line height: 1.5–1.6x for body.

Pakistani content scans better with generous line height. Do not compress.

Urdu fallback is not optional.

All critical UI strings must have Noto Nastaliq Urdu equivalents. Build this from day one.

Hierarchy through weight, not size alone.

Poppins Bold vs Regular creates clear hierarchy without jumping 3 sizes. Use this.

BRAND VOICE

How YouthPay Talks

Direct, not dumbed-down.

We do not over-explain. We trust Hania. "Add money" not "Initiate a funds transfer to your prepaid account." One word where three will do.

Confident, not arrogant.

We do not hedge. "Your money is safe" not "Your money should generally be safe." We own our product. We speak with certainty.

Warm, not trying.

We do not use slang we do not own. No "yaar," no "bestie," no cringe attempts at Gen Z. We are warm because we understand, not because we are performing.

Honest about money.

We do not pretend Rs. 7,000 is enough for everything. We acknowledge the reality without making Hania feel ashamed of it. Respect, not pity.

COPY BEFORE & AFTER

Every word must earn its place.

ONBOARDING CTA

BEFORE

Create your account to access our youth financial services platform

AFTER

Your money. Ready in 2 minutes.

EMPTY STATE — NO TRANSACTIONS

BEFORE

No transactions found. Please initiate a payment to see your activity here.

AFTER

Nothing here yet. First spend incoming?

LOW BALANCE NOTIFICATION

BEFORE

Your account balance has fallen below Rs. 500. Please request a top-up.

AFTER

Running low — Rs. 450 left. Need a refill from home?

SAVINGS MILESTONE

BEFORE

Congratulations! You have reached your savings goal.

AFTER

You did it. Xander's pasta is officially yours this weekend.

PARENT DASHBOARD INTRO

BEFORE

Welcome to the parent portal. Here you can monitor your child's spending.

AFTER

See exactly what she's spending — and top up in one tap.

SECTION 01

Index / Hero Screen

HERO SCREEN RULES

- Background: Deep Navy (#1B2A4A). Not white. Not gradient. Solid, trustworthy.
- Headline: Poppins Bold 32px WHITE — max 5 words per line. Two lines max.
- Subtext: Lora Italic 16px, Cream or Gold. Emotional. Not descriptive.
- "Get Started" CTA: Tomato Red pill, full width minus 32px margin. No outline buttons on dark bg.
- No carousel. No animation on first load. Load instantly. Silence is confidence.
- Bottom: "Trusted by parents" micro-copy in Gold. Builds parental trust before the signup.

SECTION 02 — ONBOARDING FLOW

3 screens. 60 seconds. No forms.

Screen 1: Who are you?

Two large buttons: "I'm the teen" / "I'm the parent." No dropdown. No form. Visual icons. Huge tap targets. Instant.

Screen 2: One number.

Phone number only. Poppins Bold 28px input. No email, no DOB, no address. Just the number. OTP next. Trust first.

Screen 3: Meet your card.

Show the card — animated slide up. "Your YouthPay card is on its way." Instant emotional reward before they've done anything.

SECTION 03

Teen Dashboard — The Daily Driver

BALANCE DISPLAY

Balance in Poppins Bold 32px, centre-aligned on Navy card. This is the hero of the screen. Everything else is secondary. She should see her balance in 0.2 seconds.

GREETING PERSONALISATION

"Good afternoon, Hania." Not "Hi User" — her actual name, always. Capitalised. Time-aware. This costs nothing and means everything.

SPENDING BAR CHART

Simple 7-day bar chart. Tomato red bars. No axes labels — heights tell the story. She sees peak weekend spending without maths.

TRANSACTION FEED

Merchant name prominent. Amount in Tomato (spend) or Green (receive). No confusing reference numbers. Timestamp in grey. Clean rows.

BOTTOM NAVIGATION

4 items max: Home, Wallet, Goals, Profile. Icons bold, labelled. Active state: Tomato Red icon + label. No hamburger menu. No hidden features.

SECTION 04 — WALLET & CARD SCREEN

- Card visual: full-bleed in Tomato Red with minimal type. Card number visible only via in-app biometric tap. "Reveal details" button.
- Card name: Hania Khan — her name on the card, bold, proud. This is her identity object.
- Quick stats below card: This month spent / This month saved / Cashback earned.
- Recent merchants shown as brand logo chips — visual, scannable, not a boring list.

SECTION 05

Goals — The Savings Vault

Visual jars, not spreadsheets

Each savings goal is a visual "jar" that fills up with colour as she saves. At 100%: animation celebration, confetti burst, Tomato red notification.

Goal names in her words

"Xander's Pasta Dinner" not "Dining Goal." She names it. The product remembers it. Every top-up pushes her closer to her own words.

Auto-save option

"Auto-save 5% of every top-up into Xander's Fund." One toggle. Set and forget. She sees the jar fill. This is financial literacy disguised as joy.

SECTION 06 · PARENT DASHBOARD

The Parent App — Where Trust Lives

First Screen: Simple Statement

"Hania spent Rs. 4,200 this week. Up Rs. 800 from last week." One number. One context. Then detail on tap. Dad opens this in 8 seconds. He sees the story. Not a CSV.

Spend Limits by Category

"Shopping: Rs. 2,000 / week." Toggle on/off. Soft limit (warning to Hania) vs Hard limit (block). Dad chooses. Hania gets notified at 80%, not at 100%. Dignity preserved.

Top-up: One Tap

Big green button. "Send Hania Money." Amount presets: 500 / 1000 / 2000 / Custom. Confirmation via biometric. Money arrives on her phone in 3 seconds via RAAST. Done.

Monthly Report — Beautiful, Not Scary

"This month Hania's top categories: Cafeteria, Coffee, Online Shopping." Pie chart in YouthPay colors. No shocking numbers. Context. Trend. A tool for conversation, not confrontation.

SECTION 07 · WAITLIST PAGE

The Waitlist — The First Impression

- Waitlist copy leads with scarcity + social proof: "2,400 teens ahead of you" creates urgency without lying.
- Phone number only. No email. No name. Lowest friction possible. She does not trust forms.
- Social share after join: "I just joined the waitlist for YouthPay. Rs. 7K hits different with a real card." Pre-written tweet/caption. She shares it. That is your acquisition engine.

DESIGN RULES

Do's and Don'ts

DO

Use bold color blocks as backgrounds.

Mamdani poster energy. Confident. Community-made.

Design for one hand, one thumb.

All CTAs bottom 40% of screen. She's scrolling with her right thumb on the bus.

Show her name in the first screen.

"Good evening, Hania" = she downloaded the right app. Immediate belonging.

Use Poppins Bold for anything important.

Weight creates hierarchy. No need to change sizes radically.

Make empty states delightful.

"No spends yet today — that's either very impressive or very early." Personality.

Use Urdu as a first-class language.

Not a toggle. Not an afterthought. Urdu button on every onboarding screen.

Round pill buttons for CTAs.

Soft, modern, tactile. Not square buttons. Not outlined buttons on dark bg.

Celebrate every milestone.

First transaction, first save, first top-up. All get a small confetti moment.

DON'T

Use gradients as your brand identity.

Neon crypto energy. Wrong product, wrong audience, wrong decade.

Put important actions in the top 30% of screen.

She holds the phone in one hand. Top = unreachable. Bottom = accessible.

Use generic bank copy.

"Transaction successful" "Done! Rs. 500 landed." Human language. Always.

Show all features on screen one.

One screen, one job. Overwhelm kills the onboarding. Feature creep kills retention.

Use red for everything.

Red is the action/energy color. Save it. If everything is red, nothing is red.

Use ALL CAPS for body text.

Aggressive. Loud. Exhausting. ALL CAPS = 7px labels only. That is the rule.

Build desktop first.

Hania is mobile-only. Always. Desktop is not her world. Mobile is the product.

Ignore load time.

Every 100ms of extra load time is a reason to quit the app. Perceived speed is real speed.

Design for Hania.

Meerab will notice.

Everyone else will follow.

THE ONE DESIGN PRINCIPLE THAT OVERRIDES ALL OTHERS

Bold over Safe

Use strong color. Take visual risks. Hania has seen a thousand bland apps. Boring is invisible. Bold gets remembered.

Warm over Clinical

Every copy choice, every color, every animation should feel like it was made by someone who knows Karachi — not copied from a San Francisco playbook.

Identity over Utility

The card is a status object. The app is an identity statement. Utility is the floor, not the ceiling. Make her proud to show it.

Speed over Features

She will forgive a missing feature. She will not forgive a slow load. Performance is a design value. Ship fast. Ship right.

Trust over Cleverness

Dad must trust the app with his money. Hania must trust it with her dignity. Trust is built through consistency, not clever UX tricks.
